“This cherry library tells a story through custom details and materials, including the custom-tiled gas fireplace, art niche, and bookshelves for an extensive collection. The room is designed to create an elegant yet relaxed space for enjoying reading and conversation, or even competition in the bonus game table area. A custom, hand-molded thistle tile reflects the family’s Scottish heritage, while the owner’s world travels are evoked by House of Hackney’s Florika wallpaper, inspired by paisley patterns from the ancient Silk Road. The jewel tones of the hand-glazed hearth and rich wallpaper create inviting and inspiring surroundings for gatherings of family and friends.”
